

Environmental Health and
Radiation Safety

Centralized Chemical Waste Management

Centralized chemical waste management allows Environmental Health & Radiation Safety (EHRS) to evaluate each waste container for characterization and disposal. This combines waste from all over each campus (Main, HSC & Ambler) into one designated Centralized Accumulation Area (CAA) on each campus for evaluation and consolidation prior to transportation to an off-site disposal facility. This allows for more efficient waste disposal operations and minimizes the number of containers shipped for disposal. Please contact EHRS at (215) 707-2520 with any questions.
