These pictograms give important information at a glance. When looking at a chemical container’s label or section 1 of an SDS you may find one, or several, of the pictograms to the right. These will notify you of special handling procedures or alert you to the personal protective equipment, PPE, needed when using that substance. Refer to section 8 of the SDS for recommended PPE.
Example Chemical Label Acetone

- Signal word DANGER
- Pictograms Exclamation Mark and Flame
