

TEMPLE UNIVERSITY ENVIRONMENTAL HEALTH AND RADIATION SAFETY

NO. 3.3

TITLE: Chemical Hygiene Training

Page 1 of 1

ISSUED: 6/93

REVISED: 9/15

All individuals who work with hazardous chemicals must receive chemical hygiene training.

Content of Training

The topics addressed in this training may include items such as:

- The Occupational Exposure to Hazardous Chemicals in the Laboratory standard (known as OSHA's Lab Standard).
- Temple University's Chemical Hygiene Plan and Hazardous Material Management policies.
- The duties and responsibilities of the Chemical Hygiene Officer.
- Selection, use and the limitation of personnel protective equipment.
- Proper work practices, engineering controls, handling highly toxic materials, prohibited activities and caution signs and labels.
- Proper storage of hazardous chemicals and their compatibility.
- Accidental exposure, decontamination, reporting, emergency response and post exposure evaluation.
- Temple University Policies and Procedures on handling, storing and disposal of Hazardous Chemicals.
